E-mail: elcom@elcom.sk

3. Free Version User Agreement

3.1 Usage and distribution restrictions

The evaluator/user/buyer/owner may not use or distribute Elcom software for any unlawful purpose. The evaluator/user/buyer/owner is not allowed to attempt to disassemble or decompile Elcom Software and products.

3.2 Copyright restriction

Elcom name and any logo or graphics file that represents our software may not be used in any way to promote products developed with our software. All parts of Elcom software and products are copyright protected.

3.3 Limitation of responsibility

The evaluator/user/buyer/owner of Elcom software will indemnify and defend Elcom against lawsuits, claims, costs associated with defense or accusations that result from the use of Elcom software.

Elcom is not responsible for any damages whatsoever, including loss of information, interruption of business, personal injury and/or any damage or consequential damage without limitation, incurred before, during or after the use of our products.

1 Program description

- 32-bit Windows® console application
- provides the creation of communication connection between the modem on the PC side and the modem on the ECR side

2 Program parameters

DIALER.EXE <portNum> <portSpeed> </operation> <phoneNum>

- *portNum* – the serial port number that the modem is connected to: (1 – 9)
- *portSpeed* – communication speed: (9600, 19200) Bd
- *operation*:
 /d – make a connection (i. e. dial telephone number)
 /h – cancel the connection (hang up)
- *phoneNum* – telephone number

Important note: If connection created successfully, program create 'dial' file, which contains telephone number. After disconnection this file will be deleted.

Examples of use:

dialer.exe 1 9600 /d 00421517464111

- this opens a modem communication connection using the modem on port #1, with speed of 9,600 Bd to the telephone number 00421517464111

dialer.exe 1 9600 /h

- closes the modem communication connection on the port #1
